

I am writing over the proposal to give Low Power FM priority over current FM translator service. This proposal would have a dramatic effect on many people's lives as they receive K-Love Radio through FM translator service. K-Love has been a vital part of my life for about 3 years now. The music is uplifting and helps provide a balance to my life. It is a relief that encouraging programming like K-Love exists among the garbage that fills the air waves now.

I feel the government underestimates the effect that Christian programming plays in the community. We need the morals and encouraging message of Christian stations like K-Love. Since K-Love is a national broadcaster, we rely on local and regional translators to receive the signal. Any action that would endanger this would be dramatic.

K-Love is also key to the public interest in that it provides information for those who need help in their spiritual lives. No matter if you believe in God or not, we all have spiritual lives.
